

Veeam Reporter

for VMware Infrastructure

Veeam Reporter tells you all there is to know about your VMware Infrastructure, in virtually no time.

Veeam Reporter collects information about your VMware Infrastructure environment, its components and configuration settings. From this collection, it provides comprehensive visual reports for analysis, documentation and decision-making support. Designed for professional use by ESX administrators, system integrators and datacenter managers, it is fully integrated with VMware vCenter and ESX Server.

Discover in minutes

The manual process of collecting information about your virtual environment can take hours, and is prone to human errors. With Veeam Reporter, discovery of entire infrastructure usually takes from one to five minutes and requires almost no human interaction. This is a tremendous time saver for IT administrators. If you manage a large vCenter environment, Reporter provides the ability to vary the scope of objects to represent in reports from the entire vCenter to a datacenter, cluster, or folder.

Analyze in Visio

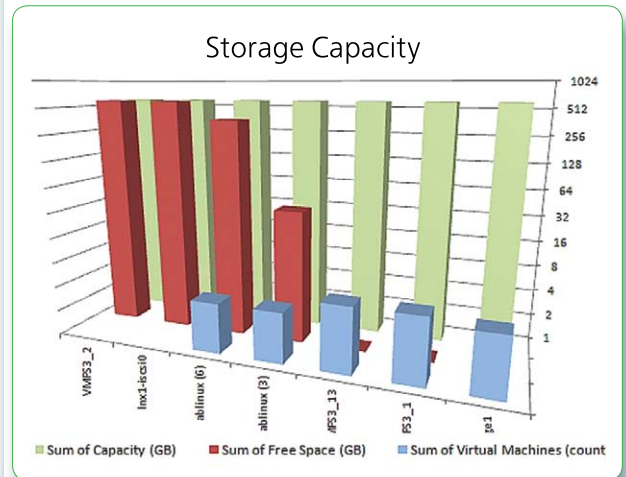

Take full advantage of professional Visio reports of your VI3 environment automatically generated by Veeam Reporter. Veeam Reporter offers you a bird's-eye view of the entire VMware Infrastructure down to specific networking, storage, VMotion and configuration points of view. This knowledge is essential for understanding your current environment, as well as identifying changes as your environment grows.

Document in Excel, Word and PDF

Report every detail of ESX or vCenter configuration settings in different file formats. Microsoft Visio is a great tool for visualizing and analyzing the virtual infrastructure. Microsoft Excel spreadsheets are good for building an inventory and allow for quick searching of a particular detail (like finding an IP address for a VM). Microsoft Word's ability to compare documents is great for tracking changes. Adobe PDF is a portable format that can be distributed and used in heterogeneous environments, as well as for information archival purposes.

Designed for system architects and administrators in charge of VI3, ESX Server 3 and VirtualCenter

DISCOVER • DOCUMENT • ANALYZE

NEW Storage Capacity report is essential for storage capacity analysis, planning and deployment.

"During training there is inevitably always a discussion on documenting the (VMware) environment. Reporter is a super tool to assist in that endeavor and I never fail to draw students' attention to it."

—Peter Vroomen
VMware Technical Trainer,
XTG Training Group,
Netherlands

Reporting content:

Network

Discover and analyze your virtual network structure, including ESX Servers, virtual switches, networks and virtual machines. Check for possible problems caused by erroneous network configurations.

Storage

Discover all the details of local and shared datastores, and virtual machines that reside on them. See if LUNs are functioning correctly.

Storage Capacity

Analyze and plan your storage with detailed statistics on data-store capacity and utilization, virtual machine population on those datastores, and see what virtual machines are running out of free space on their logical disks.

VMotion

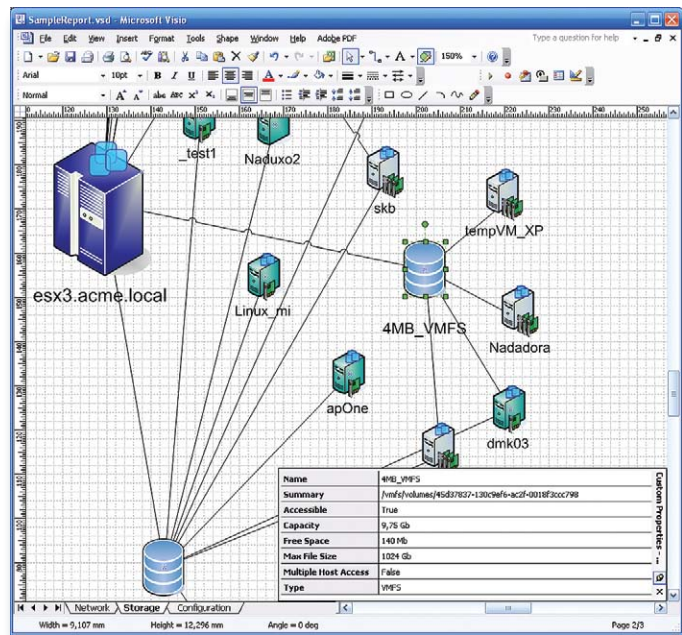

Plan your VMotion deployment strategy or check the current VMotion configuration from a VM standpoint. View potential VMotion candidate hosts and confirm that selected VMs can be included into VMotion.

Configuration

Check the resource pools configured in your VC or ESX Server and see the specific CPU and memory shares.

Inventory

Get the full inventory of your VMware infrastructure in Excel, Word or PDF.

Generate Visio diagrams of your VMware Infrastructure in virtually no time.

System Requirements

Windows XP SP2, Windows Server 2003;
 Microsoft .NET Framework 2.0 or higher;
 MS Office 2003 or higher,
 MS Excel 2007 (for Storage Capacity report),
 MS Visio 2003 or higher;

VMware Infrastructure 3:
 ESX Server 3.0 or higher, VirtualCenter 2.x

Ordering information and Support

For pricing, please contact your Veeam Software reseller or submit a sales inquiry at <http://www.veeam.com/salesinc.html>

For technical support please visit <http://www.veeam.com/support.html> or e-mail support@veeam.com and our support representative will contact you promptly.
