9 Must-Haves for Offsite Cloud Storage

Why Veeam Vault is the best fit for you

1. Out-Of-The-Box Experience

Save valuable time and resources with zero management, configuration, or integration complexities. Veeam Vault is pre-configured and fully managed by Veeam to implement cloud and security best practices. Veeam Vault is also directly integrated with Veeam Data Platform for seamless, consolidated management.

2. Secure by Default

Safeguard your valuable data on cloud storage that's architected to Zero Trust Data Resilience (ZTDR) standards. With Veeam Vault, your backups are always air gapped, access controlled, immutable, and encrypted to keep internal and external threats at bay — so that you're ready for a clean recovery, any time.

3. Infrastructure Reliability

Select a vendor with a strong track record of reliability and vast global presence. Veeam Vault is built on Microsoft Azure, a cloud platform boasting the most global coverage among major cloud providers, with billions invested annually. With this, you can have confidence in your data's reliability, as well as compliance attainment, particularly through a data residency and sovereignty lens.

4. Designed for Durability

Ensure the reliability of your data with durable storage that's resistant to loss, corruption, outage, or disaster. Veeam Vault delivers up to 12-nines of durability, meaning just one lost object for every billion objects in 1,000 years.

Veeam Data Cloud Vault

Veeam Data Cloud Vault introduces a fully managed secure cloud storage resource on Microsoft Azure. Architected to strict ZTDR principles, Veeam Vault ensures your business' most valuable asset is always safeguarded from whatever the world throws its way.

We've eliminated the headaches of unpredictable cloud cost models to make budgeting and forecasting a breeze. Just let us know how much you need, and we'll handle the rest.

Key Benefits

Predictable: Eliminate bill shock with flat, per-TB pricing that meets your needs now and tomorrow, inclusive of API calls, data access, restore and egress charges.

Secure: Safeguard your data on ZTDR storage that's always immutable, always encrypted, and logically air-gapped from production.

Easy: Access and use on-demand cloud storage, fully-managed by Veeam with zero architecture, configuration or management requirements.

Integrated: Fully integrated into Veeam Data Platform and ready to go in just minutes without leaving the interface you know, love, and trust.

5. Performant

Adhere to service level objectives (SLOs) to ensure backups complete within windows and restores are as fast as possible to overcome disruption. Veeam Vault is built on Microsoft Azure Blob Cool storage, delivering backup and restore performance as fast as Hot storage while being more economical.

6. Disaster Recovery-Ready

Utilize a vendor that goes beyond basic storage, laying additional value with compute resources for in-cloud recovery. Veeam Vault can directly restore to compute in the same (or different) Azure region for the fastest disaster recovery.

7. Integrated

Consolidate vendors to streamline onboarding, integration, and potential support cases. Veeam Vault is fully integrated into Veeam Data Platform and fully-supported by Veeam, eradicating fragmented support processes that prolong issues.

8. Predictably Priced

Eliminate bill shock of complex pricing models that need to consider storage, API calls, retrieval and egress costs. Veeam Vault is all-inclusive and predictably priced to ease budget forecasting.

9. Leverages Investments

Maximize your existing agreements and investments with cloud providers to buy down commits and lock-in discounts. Veeam Vault is available on Microsoft Azure Marketplace, enabling you to tap into your Microsoft Azure Consumption Commitment (MACC) agreement.

About Veeam Software

Veeam®, the #1 global market leader in data resilience, believes every business should be able to bounce forward after a disruption with the confidence and control of all their data whenever and wherever they need it. Veeam calls this radical resilience, and we're obsessed with creating innovative ways to help our customers achieve it. Veeam solutions are purpose-built for powering data resilience by providing data backup, data recovery, data portability, data security, and data intelligence. With Veeam, IT and security leaders rest easy knowing that their apps and data are protected and always available across their cloud, virtual, physical, SaaS, and Kubernetes environments. Headquartered in Seattle with offices in more than 30 countries, Veeam protects over 550,000 customers worldwide, including 68% of the Global 2000, that trust Veeam to keep their businesses running. Radical resilience starts with Veeam. Learn more at www.veeam.com or follow Veeam on LinkedIn @veeam-software and X @veeam.

Microsoft + Veeam

Together, Microsoft + Veeam go beyond typical backup and recovery. Jointly, we ensure you are protected with the ability to quickly restore in the event of a disaster or ransomware attack. Our solutions provide comprehensive immutability, so you can rest assured that your data is resilient against ransomware. Whether your data resides in Microsoft Azure, Azure Stack HCI, Azure Kubernetes Service, Microsoft 365 or on premises, we help you mitigate risk and ensure your data stays secure, protected, and always available.
