

Kyndryl Cyber Incident Recovery with Veeam

Business Challenge

Cyberattacks are a harsh reality in today's hybrid multi-cloud world. This is a problem since a single breach can bring everything to a standstill and take your data and systems hostage.

This complexity is often exacerbated as organizations introduce next-gen cloud-native workloads to their IT estate adding new layers of management and security challenges. As a result, organizations are left with siloed data protection solutions, are vulnerable to cyberattacks, and are unable to meet their business continuity service level agreements (SLAs).

Disconnected data protection solutions create a recovery nightmare. Manual intervention becomes necessary, often leading to slow and unreliable restoration processes plagued by errors. This fragmented approach demands deep expertise in diverse technologies and environments, a burden that can strain your organization's ability to attract and retain the necessary skills, ultimately exposing you to significant risks.

As the demand for skilled IT professionals outpaces supply, organizations are often left to struggle to effectively implement, manage, and secure advanced technologies and complex deployments by themselves, without professional expertise.

Kyndryl Delivers Expertise

Fully managed data backup services deliver rapid, simplified recovery for business-critical applications and data - often within minutes or even seconds. Consolidate and virtualize your data center protection to transform how your data is managed and access enabling clarity and innovation. Our Integrated approach helps mitigate security and operational risks while supporting evolving compliance requirements giving you confidence and resilience in a dynamic business environment.

Benefits

Expert-led designs build trusted recovery strategies.

- **Unified solution:** Backups, platform recovery, incident response, and complete business continuity.
- **Flexible deployments:** From on-premises to the cloud, we fit your unique landscape.
- **AI-powered defense:** Stay ahead of threats with intelligent malware detection.
- **Rock-solid data protection:** Multiple immutable storage options available for ultimate security.
- **Seamless rehearsals:** Stress-test your recovery without disrupting your business.
- **Focus on your core, and leave the rest to us:** Our experts can handle the recovery heavy lifting.

Solution Overview

Employing Kyndryl Cyber Incident Recovery with Veeam, you can minimize the effect of facing cyber incidents by enabling swift and efficient recovery of essential business functions and data, delivered by experts in Cyber Resilience. Think of it as an emergency response team for your digital infrastructure. With this solution, we automate data protection and recovery workflows to ensure your critical data is readily available. The latest data immutability features from Veeam make data untouchable even for the most sophisticated hackers and helps deliver a solution that is cyber resilient by design.

Plus, forget about manual recovery processes. From physical and virtual workloads to business processes, applications, and databases, Kyndryl can orchestrate your rapid and reliable comeback. That said, recovery is just half the story. Kyndryl goes even further by providing real-time monitoring, anomaly detection, and comprehensive reporting.

Use Cases

Hybrid-cloud-managed cyber resiliency + backup and incident recovery services (Backup as a Service)

Secure your data across every environment with multi-layered protection.

Managed Hybrid Platform Recovery (Disaster Recovery as a Service)

Rewind disaster with always-on DR that's, orchestrated for your cloud at any scale

Managed Microsoft 365 cyber resiliency and backup

Shield your Microsoft 365 environments, including Outlook, SharePoint, OneDrive, and Teams with locked-down automated backups and airtight recovery.

Cloud-native and hyperscaler data protection

Neutralize cyber threats and safeguard cloud-native data with automated backup and Instant Recovery across AWS, Azure, and Google Cloud.

Application transformation and hybrid cloud acceleration

Seamlessly migrate and transform legacy applications from on-premises to public clouds like AWS, Azure, and Google Cloud.

Kubernetes and OpenShift next generation workloads

Kubernetes and OpenShift workloads are protected from cybercriminals via seamless backup, immutable data, Instant Recovery, and application mobility.

Conclusion

Kyndryl + Veeam. Empowering Innovation, Ensuring Resiliency.

Together, Kyndryl and Veeam deliver comprehensive cyber resiliency solutions combining the benefits of managed services and expert infrastructure management. Customers can expect improved business agility — while unlocking valuable insights from their data.

Kyndryl's expertise in modernizing and managing the world's mission-critical systems coupled with Veeam's secure data foundation accelerates the development and deployment of data-driven innovations.

This powerful partnership enables organizations to move forward with confidence and transform ideas into reality.
