9 Must-Haves for Offsite Cloud Storage

Why Veeam Data Cloud Vault is the best fit for you.

1. Out-Of-The-Box Experience

Save valuable time and resources with zero management, configuration, or integration complexities. Veeam Data Cloud Vault is pre-configured and fully managed by Veeam to implement cloud and security best practices. Veeam Vault is also directly integrated with Veeam Data Platform for seamless, consolidated management.

2. Secure by Default

Safeguard your valuable data on cloud storage that's architected to Zero Trust Data Resilience (ZTDR) standards. With Veeam Vault, your backups are always air-gapped, access controlled, immutable, and encrypted to keep internal and external threats at bay, so you're ready for a clean recovery at any time.

3. Infrastructure Reliability

Choose a vendor grounded in reliability and global scale. Veeam Vault leverages Microsoft Azure and Amazon S3, industry-leading hyperscale cloud platforms with expansive regional coverage and continuous investment in infrastructure. This enables organizations to store data closer to where they operates while supporting durability, availability, and regulatory requirements related to data residency and sovereignty.

Veeam Data Cloud Vault

Veeam Vault introduces a fully managed secure cloud storage resource. Architected to strict ZTDR principles, Veeam Vault ensures your business' most valuable asset is always safeguarded from whatever the world throws its way. We've eliminated the headaches of unpredictable cloud cost models to make budgeting and forecasting a breeze. Just let us know how much you need, and we'll handle the rest.

Key Benefits

Predictable: Eliminate bill shock with flat, per-TB pricing that meets your needs now and tomorrow, inclusive of API calls, data access, restore and egress charges.

Secure: Safeguard your data on ZTDR storage that's always immutable, always encrypted, and logically air-gapped from production.

Easy: Access and use on-demand cloud storage, fully managed by Veeam with zero architecture, configuration, or management requirements.

Integrated: Fully integrated into Veeam Data Platform and ready to go in just minutes without leaving the interface you know, love, and trust.

4. Designed for Durability

Ensure the reliability of your data with durable storage that's resistant to loss, corruption, outage, or disaster. Veeam Vault delivers up to 12 nines of durability, meaning just one lost object for every billion objects in 1,000 years.

5. Performant

Adhere to service level objectives (SLOs) to ensure backups complete within windows and restores are as fast as possible to overcome disruption. Veeam Vault is a secure storage solution built on Microsoft Azure Blob Cool and AWS S3 storage, delivering backup and restore performance as fast as Hot storage while being more economical.

6. Disaster Recovery-Ready

Utilize a vendor that goes beyond basic storage, laying additional value with compute resources for in-cloud recovery. Veeam Vault can directly restore to compute in the same (or different) Azure or AWS region for the fastest disaster recovery.

7. Integrated

Consolidate vendors to streamline onboarding, integration, and potential support cases. Veeam Vault is fully integrated into Veeam Data Platform and fully supported by Veeam, eradicating fragmented support processes that prolong issues.

8. Predictably Priced

Eliminate bill shock of complex pricing models that need to consider storage, API calls, retrieval and egress costs. Veeam Vault is all-inclusive and transparently priced to ease budget forecasting.

9. Leverages Investments

Maximize your existing agreements and investments with cloud providers to buy down commits and lock-in discounts. Veeam Vault is available on both the Azure and AWS Marketplace, enabling you to tap into your commitment agreements.

About Veeam Software

Veeam is the Data and AI Trust Company, specializing in helping organizations ensure their data and AI are fully understood, secured, and resilient to enable the acceleration of safe AI at scale. As the market leader in both data resilience and data security posture management, Veeam is built for the convergence of identity, data, security, and AI risk. Veeam delivers deep contextual intelligence across every data asset, identity, and AI model. The company governs access for both humans and AI agents, automates privacy, compliance, and remediation processes, and protects and recovers organizations from modern threats — including ransomware, disasters, AI errors, and ensuring the restoration of clean, trusted data. Veeam empowers organizations to move beyond simply protecting data, enabling them to activate and unlock its full potential. Headquartered in Seattle with offices in more than 30 countries, Veeam protects over 550,000 customers worldwide, including 82% of the Fortune 500, who trust Veeam to keep their businesses running.
