

TCS Powers Managed Backup as a Service for Microsoft 365 with Veeam

Business Challenge

Microsoft 365 is the backbone for many businesses, enabling email communication, file sharing, collaboration and productivity.

Many businesses assume Microsoft 365 automatically protects their data. The misunderstanding falls between Microsoft's perceived responsibility and the user's actual responsibility regarding the protection and long-term retention of their Microsoft 365 data. Microsoft ensures services availability, and customers are responsible for protecting the data.

Additionally, managing and backing up SaaS environments like Microsoft 365 is increasingly complex, particularly given the constraints on talent and budget. Many companies find themselves unable to deploy their own backup solutions, which drives them to seek managed BaaS providers for their expertise and quick implementation capabilities.

IT professionals must ensure that their backup data remains impervious to threats, that their backup environments operate at peak performance, and that data issues can be remediated swiftly.

Key Benefits

- **Comprehensive Data Protection:**
Safeguard your entire Microsoft 365 environment, including Exchange Online, SharePoint, OneDrive, and Teams. Ensure business continuity with enterprise-grade backup and recovery features tailored to your specific needs.
- **Simplified Compliance Management:**
Meet legal and regulatory requirements with ease. Implement customizable retention policies, leverage eDiscovery features, and maintain detailed audit trails to ensure your Microsoft 365 data remains compliant and secure.
- **Managed Service Expertise:**
Leverage TCS' global experience in managing complex IT environments. Benefit from end-to-end service, including initial setup, ongoing monitoring, and optimization, ensuring your backup solution operates at peak performance.
- **Enhanced Security Measures:**
Protect your data with advanced security features, including encryption, role-based access control, and immutable backups. Safeguard against both internal and external threats, including ransomware attacks.

Solution Overview: TCS Managed Backup as a Service for Microsoft 365

TCS Managed BaaS for Microsoft 365, powered by Veeam, delivers a comprehensive and reliable solution for safeguarding vital business data within the Microsoft 365 environment.

As organizations increasingly rely on Microsoft 365 for email, collaboration, and document storage, the risk of data loss due to accidental deletion, security threats, or compliance gaps becomes a critical concern. TCS Managed BaaS directly addresses these challenges by offering enterprise-grade data protection and recovery features that are meticulously tailored to the specific needs of each business.

Microsoft 365 Backup

Protect Microsoft 365 data
from accidental deletion and
security threats

Quickly restore
Microsoft 365 data
with industry-leading flexibility

Meet compliance requirements
with fast search-and-find
capabilities

Use Cases

Comprehensive M365 Data Protection

Safeguard your entire Microsoft 365 environment, including Exchange Online, SharePoint, OneDrive, and Teams. Protect against accidental deletion, security threats, and retention policy gaps with automated backups and flexible retention options.

Rapid Disaster Recovery

Ensure business continuity with fast and efficient recovery options. Quickly restore individual items, entire mailboxes, or complete sites back to Microsoft 365 or on-premises environments, minimizing downtime and data loss in the event of a disaster.

Simplified Compliance Management

Easily meet regulatory and legal requirements with long-term retention policies and immutable backups. Leverage advanced eDiscovery capabilities to quickly locate and export specific data for audits or legal proceedings, ensuring your organization stays compliant.

Efficient Self-Service Restore

Empower end-users and reduce IT workload with a secure self-service restore portal. Allow authorized users to initiate restores of emails, files, and other items without direct access to the backup server, improving productivity while maintaining security.

Conclusion

TCS + Veeam: Ensuring cyber resilience and compliance for Microsoft 365.

The TCS Backup as a Service for Microsoft 365, powered by Veeam, represents a cutting-edge solution in data protection and management. By combining Veeam's industry-leading backup technology with TCS' extensive managed services expertise, this offering delivers unparalleled security, flexibility, and efficiency for organizations relying on Microsoft 365. The solution's comprehensive coverage of Microsoft 365 services, coupled with advanced recovery options and flexible storage choices, ensures that organizations can confidently protect their vital information assets.

By choosing TCS Managed BaaS powered by Veeam, businesses gain a future-proof solution that scales with their needs, meets stringent compliance requirements, and provides peace of mind in an increasingly complex threat landscape. Embrace the next generation of Microsoft 365 data protection and position your organization for success in the digital age.
