# The Unified Cloud for Data Resilience

Veeam Data Cloud

A Modern Approach to Data Resilience

Protecting modern workloads like SaaS applications and cloud environments has become a full-time challenge. Teams are under constant pressure to meet aggressive recovery SLAs, defend against ransomware, and ensure compliance, often with limited resources and siloed tools. As complexity grows and risks mount, organizations need a smarter, more unified approach to data resilience in the cloud.

That's where **Veeam Data Cloud** comes in, an all-inclusive SaaS platform designed to keep your business running no matter what. Built on Veeam's industry-leading backup and recovery technology, it delivers resilient, policy-driven protection across your workloads, fortified with embedded security and AI-driven insights. Veeam Data Cloud helps you safeguard critical data, simplify operations, and recover fast when it matters most.

Veeam Data Cloud
The Unified Cloud for Data Resilience

Data Backup · Data Recovery · Data Security · Data Intelligence · Data Portability

Shared services

Industry leading technology · All-inclusive SaaS platform

Unified Multi-Workload UI/UX

Protected workloads

M365 · Entra ID · Azure · Salesforce · Vault

04082024

Stay Resilient and Streamline Operations

80% of vulnerabilities discovered involve Microsoft 365

86% of cloud-hosted data was affected by an organizations' last attack

22% cite a skills shortage for innovation as their #1 challenge

Key capabilities

Policy automation
Ensure consistent protection everywhere with an automated, policy-driven strategy

Precise, rapid recoveries
Minimize downtime with fast, flexible recovery options for zero disruption

Actionable insights
Leverage comprehensive monitoring, reporting and analytics

Cyber resilience
Ensure the integrity and privacy of your data through air-gapping, immutability, encryption and more

Threat intelligence
Proactively detect, respond and overcome threats like ransomware to protect business-critical data

Common RBAC
Centralize and standardize access permissions at a per-app and role level for enhanced security

Lower TCO
Reduce spend with a predictable, all-inclusive SaaS platform with no infrastructure to maintain

Efficiency at scale
Unify data resilience and bridge expertise gaps to improve usability while eliminating operational toil

Evolving AI acceleration
Releasing throughout 2025, leverage AI to optimize backup, security and recovery while freeing up resources

About Veeam Software

Veeam, the #1 global market leader in data resilience, believes every business should control all their data whenever and wherever they need it. We're obsessed with creating innovative ways to help our customers achieve data resilience. We do that by offering purpose-built solutions that provide data backup, data recovery, data portability, data security, and data intelligence. Headquartered in Seattle, with offices in more than 30 countries, Veeam protects over 550,000 customers worldwide, who trust Veeam to keep their business running.
