Secure Azure Backup with No Surprises

Veeam Data Cloud

Veeam Data Cloud *for Microsoft Azure*

Protecting Azure workloads has become a mess of mismatched tools, unpredictable costs, and fragile backups that can't keep up with today's threats. Whether you're running lean IT or managing your cloud at scale, it's harder than it should be to get truly resilient.

Veeam Data Cloud changes that, delivering a purpose-built SaaS solution that natively protects your Azure workloads and is unified with the other apps and data critical to your business. Powered by fully automated backups that are always immutable and encrypted, fast and clean recoveries, and predictably low TCO, you get the resilience your cloud deserves and the simplicity your team needs.

Key Benefits

- **One Platform, Full Coverage:** Seamless, policy-automated protection that's purpose-built for Azure and unified with other apps, services and data.

- **Resilient by Default:** True immutability, encryption and air-gapping is the standard, not the upgrade. Your backups are always locked, reliable and ready for the fastest recovery.

- **Backup without Bill Shock:** All-inclusive pricing that covers the service, storage and support so you know exactly what you're paying for.

Leading Capabilities

Policy Automation
Set it and forget it to ensure consistent protection without manual oversight

Recovery Flexibility
Quickly recover what you need, when and where you need it

Always Immutable
Trust that your backups can't be changed, deleted or encrypted

Air-Gapped
Isolate backups from production environments and attack paths

Encrypted
Protect sensitive data both in transit and at rest with encryption

Data Lifecycling
Automatically back up snapshots to object storage to minimize sprawl

All-inclusive
Avoid surprise bills and confidently plan your backup budget

Storage Optimization
Shrink storage consumption with compression that allows you to store more data in less space

Unified Resilience
Manage protection across cloud, apps, and workloads from one place

Use Cases

Accidental deletion or misconfiguration

Accidental deletion or misconfiguration happens often in Azure environments. With Veeam Data Cloud *for Microsoft Azure*, automated, policy-driven backups enable precise, point-in-time restores of files, virtual machines (VMs), and databases, no matter when or how the data was lost. Recover exactly what you need, quickly and efficiently, so users and services remain productive without costly downtime or extensive rework.

Ransomware and cyberattack recovery

Ransomware and insider threats can compromise both production and backup data. With Veeam Data Cloud *for Microsoft Azure*, your backups are always immutable, air-gapped, and tamper-proof by default. This ensures they remain secure and isolated from your production environment. In the event of an attack, you can recover cleanly and confidently, without paying ransom or risking extended business downtime.

Cloud cost optimization

Cloud backup costs can quickly spiral out of control due to over-retention, inefficient storage use, and hidden fees, especially when recovering data. Veeam Data Cloud *for Microsoft Azure* addresses these challenges with built-in compression, back up to cost-effective object storage, automated retention policies, and predictable all-in pricing. Eliminate waste, stay within budget, and keep your backup costs predictable, even as your data footprint grows.

Compliance and long-term retention

Meeting regulatory requirements for tamper-proof, long-term data retention is challenging. Veeam Data Cloud *for Microsoft Azure* delivers encrypted, immutable backups with customizable retention policies and audit-ready management across all your workloads. Stay compliant, avoid costly fines, and streamline audit preparation without adding operational complexity or overhead.

About Veeam Software

Veeam®, the #1 global market leader in data protection and ransomware recovery, is on a mission to empower every organization to not just bounce back from a data outage or loss but bounce forward. With Veeam, organizations achieve radical resilience through data security, data recovery, and data portability for their hybrid cloud. The Veeam Data Platform delivers a single solution for cloud, virtual, physical, SaaS, and Kubernetes environments that gives IT and security leaders peace of mind that their apps and data are protected and always available. Headquartered in Seattle, Washington, with offices in more than 30 countries, Veeam protects over 550,000 customers worldwide, including 67% of the Global 2000, who trust Veeam to keep their businesses running. Radical resilience starts with Veeam. Learn more at www.veeam.com or follow Veeam on LinkedIn @Veeam-Software and X @Veeam.
