Veeam Backup for Microsoft Office 365

Complete access, control and protection for your Office 365 data

Microsoft provides a wide array of powerful services within Office 365 — but a comprehensive backup of your Office 365 data is not one of them.

Veeam® Backup for Microsoft Office 365 eliminates the risk of losing access and control over your Office 365 data including Exchange Online, SharePoint Online, OneDrive for Business and Microsoft Teams — so that your data is always protected and accessible.

With Office 365 — It’s your data

Microsoft Office 365 enables your enterprise to work anywhere, anytime, without the need to host your own email, files and content management infrastructure. Even though Microsoft hosts the infrastructure, this doesn’t replace your responsibility of maintaining a backup of your business-critical Office 365 data.

With Office 365, it’s your data — you control it — and it is your responsibility to protect it.

With Veeam Backup for Microsoft Office 365, you can:

• Protect your Office 365 data from accidental deletion, security threats and retention policy gaps
• Quickly restore individual Office 365 items and files with industry-leading recovery flexibility
• Meet legal and compliance requirements with efficient eDiscovery of Office 365 backup items

What’s new in version 4

NEW! Up to 30x faster backups

Achieve faster backup performance for SharePoint Online and OneDrive for Business data, shortening backup windows and ensuring you make your RTOs and RPOs.

NEW! Added security

Version 4 provides added security with at-rest encryption for Office 365 data in object storage for peace of mind that your data is secure and protected.

NEW! Object storage support

Leverage cost-efficient object storage to store your Office 365 data and leverage unlimited scalability.

“With Veeam Backup for Microsoft Office 365, our customers will sleep soundly knowing that their emails are fully safe.”

Jérémy Verda,
Executive System Engineer
Logical TIC SPRL
Back up Office 365 to any location — on premises or in cloud object storage

- Retrieve Office 365 Exchange Online, SharePoint Online, OneDrive for Business and Microsoft Teams data from a cloud-based instance of Office 365 and uniquely back up the data weekly, daily, or as often as every five minutes in Microsoft’s native format — an archive database based on Extensible Storage Engine (ESE), also known as the Jet Blue database
- Back up Exchange and SharePoint on-premises, reducing the impact to your datacenter and allowing YOU to set the frequency and timing of your backups
- With Veeam, you’re not locked into a specific storage target for your Office 365 data. Store it anywhere you want — on premises or in cloud object storage — including AWS S3, Azure Blob, IBM Cloud and S3-compatible providers
- Protect data posted and shared with Microsoft Teams chats, files and sites, as Teams data is journaled into Exchange Online and SharePoint Online

Restore Office 365 with industry-leading recovery flexibility

Never settle for less than reliable, granular restore of Office 365 email items, SharePoint sites, documents, libraries and lists, as well as OneDrive for Business accounts, files and folders in a few simple clicks.
- Quick search and granular recovery of individual objects — including Microsoft Teams data — residing in a protected copy of your Office 365 backup
- Direct restore of Office 365 items through an industry-leading number of ways giving you ultimate restore flexibility

eDiscovery of Office 365 data

Without an easily accessible copy of your data, retrieving emails for regulatory or compliance reasons can be costly, time consuming and a major disruption to your business.

With Veeam, you can leverage the familiar, advanced search capabilities and the flexible recovery and export options to perform eDiscovery on Office 365 data — just as easily as you would with a traditional on-premises data backup.
