Veeam Software for DoD and Federal Civilian Agencies

Veeam Availability Suite

Veeam Availability Suite is Veeam’s flagship backup solution that enables modern data protection and is simple, flexible and reliable. This comprehensive enterprise suite empowers organizations with advanced capabilities and powerful tools to effectively achieve their goals of achieving complete data protection, with high availability and reduced downtime. Businesses of all sizes, from small startups to the largest enterprises, embark on similar journeys for keeping their data protected and available, and Veeam Availability Suite is the complete tool for the job.

Veeam Backup & Replication

Veeam® Backup & Replication™ delivers powerful and reliable data protection capabilities that scale effectively for cloud, virtual and physical workloads for all major platforms and enterprise applications.

Veeam One (Reporting & Monitoring)

Veeam ONE™, provides complete visibility into cloud, virtual and physical-based workloads through monitoring and reporting, protecting against potential problems before operational impact.

Veeam Backup for Microsoft Office 365

Veeam® Backup for Microsoft Office 365 eliminates the risk of losing access and control over your Office 365 data including Exchange Online, SharePoint Online, OneDrive for Business and Microsoft Teams — so that your data is always protected and accessible.

Veeam Management Pack for Microsoft System Center

Veeam® Management Pack™ (MP) for System Center is the most comprehensive and intuitive System Center extension for app-to-metal management of VMware vSphere, Microsoft Hyper-V and Veeam Backup & Replication™. Through actionable monitoring, reporting and real-time analysis, Veeam MP helps IT decision makers make faster and more accurate decisions.
Five key capabilities that enable Modern Data Protection

Veeam Availability Suite is a simple, flexible and reliable solution that delivers:

**High-Speed Recovery**

**Rapid recovery of what you want, the way you want it**

Veeam Availability Suite helps you quickly recover the data you need to enable the lowest RTOs with tools like Multi-VM Instant Recovery, Veeam Direct Restore to AWS, Azure and Azure Stack, Veeam Explorer™ for Microsoft Exchange, Active Directory, SharePoint and SQL Server, Veeam Explorer for Oracle — and more!

**Data Reuse**

**Using backup data and storage snapshots to create an exact copy of your production environment**

Enjoy low-risk deployment with Veeam DataLabs capabilities including Stage Restore, to better adhere to governance policies. Veeam allows you to test changes in a production like environment before actually deploying them.

**Data Loss Avoidance**

Low RPOs and streamlined disaster recovery

**Low RPOs and streamlined disaster recovery**

Avoid data loss and achieve lower RPOs with the following great features: Veeam Cloud Tier for object storage support, Enterprise Application plug-ins for Oracle RMAN and SAP HANA, Built-in WAN acceleration, Backup from Storage Snapshots for the world’s leading storage providers, Veeam Cloud Connect, Scale-out Backup Repository™, advanced native tape support and more.

**Complete Visibility**

**Proactive monitoring, alerting and intelligent automation to prevent of issues before operational impact**

Veeam Availability Suite provides the ability to manage virtual, physical and cloud-based workloads from a single unified console with Veeam ONE™. Veeam ONE Intelligent Diagnostics, Remediation Actions and HeatMaps enable advanced monitoring so that you can discover, be alerted to, and automate resolution for issues in your IT environment before they have a significant impact.

**Verified Recoverability**

**Guaranteed recovery of every file, application or virtual server, every time**

With Veeam DataLabs™ Secure Restore, SureBackup® and SureReplica, you can be certain your files, applications and virtual servers can be reliably restored when needed and ensure business resiliency through automated backup and disaster recovery (DR) testing.
